HEALTHCARE

Simplify and Secure the Identification of All Your Patients and Staff

Your healthcare establishment is open to the public and has a busy flow of people passing through every day. It has to provide a welcoming and reassuring environment for both patients and staff, while taking budget constraints into account. In the face of threats (health crises, terrorism, intrusions, theft), the identification of people and property is crucial. By issuing your own ID documents on plastic cards, you will meet the growing need for ensuring the security of both people and property.

Choose the Ideal Professional Solution

PVC badges are perfectly suited for use in a healthcare environment:

- Hygienic
- Convenient to wear and use every day
- Reliable and secure
- Resistant to frequent handling
- Durable
- Fully customizable
- Multi-purpose

Optimize ID Cards Management

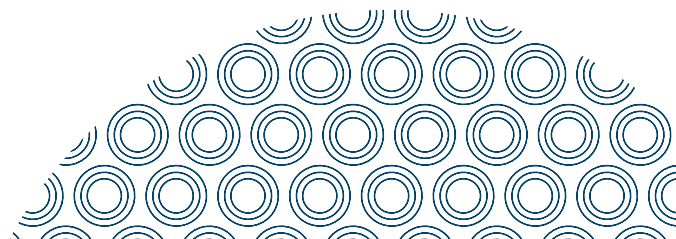

- **Flexibility and autonomy:** increase efficiency by issuing a new badge on the spot in seconds or renewing a lost badge on demand. This means that you can avoid the various constraints of external print service providers (deadline, quantity).
- **Cost per badge under control:** by issuing the cards yourself, you will benefit from a single cost per card, regardless of the volume of cards to be produced. You no longer pay extra for sending a single card or for urgent requests.
- **Brand identity:** control the card design for a professional look and feel that reflects your brand.
- **Ease of use:** as easy to use as an office printer – no training required.

Secure Your Infrastructure

- **Immediate identification:** photos printed on badges and the use of color coding for each profile allow you to recognize at a glance all the people in your establishment.
- **Secure access to premises and sensitive data:** define access permissions for each employee to control the flow of people and protect your healthcare establishment.
- **Contactless badges for health security:** contactless technology reduces the risk of contamination within your healthcare establishment.

Enhance the User Experience

- **Enhanced confidence among employees, patients, and visitors:** by requiring to wear badges on your premises, you will reassure all users and will professionalize the image of your establishment.
- **Continuity of service:** you are able to replace an employee or visitor badge at any time in the event of loss or theft.
- **Easier access to services:** you can link additional services to your ID cards, such as payment, access to medical equipment, or logical access to the computer network.

Make Your Own ID Cards

⦿ Immediately Identify All Users

- ID badges and access control for different categories of employees

- Visual ID badges for patients and visitors

⦿ Add Services to Your Badges

In addition to the visible identification elements, badges can integrate lots of other data too, becoming multi-application cards.

- Print a barcode or QR code on the card
- Encode personal data directly into the card (on magnetic strip, smartcard or RFID card).

Evolis solutions give you the ability to print all your personalized cards yourself. Depending on your needs, two issuing methods are available:

Issued personally over the counter

You print your cards one by one or as a batch, for all your users.

Issued from a self-service kiosk

The user issues their own card using an automated kiosk, reducing wait time and avoiding staff resources.

A Complete Offer Adapted to Every Requirement

For Issuing All Your Cards

Software

Intuitive software to design all your cards and badges

Printers and Consumables

Wide choice of printers depending on the volume required and the issuing method

Card Accessories

- Complete range of badge holders, lanyards, and clips to protect your cards
- Many colors to suit your brand requirements

Adopt the Electronic Signature and Optimize Your Processes with Evolis Signature Pads

Simplify document management by digitizing it! Use Evolis signature tablets to capture quickly, efficiently and securely the electronic signatures of your employees, patients and visitors.

- Simplify the process of sign-in/sign-out, while saving valuable time with document management
- Increase patient satisfaction by reducing waiting times
- Reduce the costs and environmental footprint created by large quantities of paper
- Limit errors (poor data integrity, loss of documents)
- Easily integrate collected signatures onto cards and badges to be printed
